

Open Access

Bioinformatics Methods for Biomedical Complex System Applications

Varenna, Italy
19-21 May 2008

Edited by Luciano Milanese and Paolo Romano

www.biomedcentral.com/1471-2105/10?issue=S12

I1 Trends in modeling Biomedical Complex Systems

Milanese Luciano, *et al.*

S1 Data recovery and integration from public databases uncovers transformation-specific transcriptional downregulation of cAMP-PKA pathway-encoding genes

Chiara Balestrieri, *et al.*

S2 The Human EST Ontology Explorer: a tissue-oriented visualization system for ontologies distribution in human EST collections

Ivan Merelli, *et al.*

S3 In silico saturation mutagenesis and docking screening for the analysis of protein-ligand interaction: the Endothelial Protein C Receptor case study

Federica Chiappori, *et al.*

S4 Developing optimal input design strategies in cancer systems biology with applications to microfluidic device engineering

Filippo Menolascina, *et al.*

S5 Phenotypic and genotypic data integration and exploration through a web-service architecture

Angelo Nuzzo, *et al.*

S6 Clinical bioinformatics for complex disorders: a schizophrenia case study

Emanuel Schwarz, *et al.*

S7 XML-based approaches for the integration of heterogeneous bio-molecular data

Marco Mesiti, *et al.*

S8 Identification of functionally related genes using data mining and data integration: a breast cancer case study

Ettore Mosca, *et al.*

S9 A scale space approach for unsupervised feature selection in mass spectra classification for ovarian cancer detection

Michele Ceccarelli, *et al.*

S10 Survival Online: a web-based service for the analysis of correlations between gene expression and clinical and follow-up data

Luca Corradi, *et al.*

S12 Perl procedure for protein identification by Peptide Mass Fingerprinting

Alessandra Tiengo, *et al.*

S13 Conditional independence relations among biological markers may improve clinical decision as in the case of triple negative breast cancers

Federico M Stefanini, *et al.*

S14 A computational framework for qualitative simulation of nonlinear dynamical models of gene-regulatory networks

Liliana Ironi and Luigi Panzeri

S15 Conditional independence relations among biological markers may improve clinical decision as in the case of triple negative breast cancers

Federico M Stefanini, *et al.*

S16 Towards a systems biology approach to mammalian cell cycle: modeling the entrance into S phase of quiescent fibroblasts after serum stimulation

Roberta Alfieri, *et al.*

S17 Protopia: a protein-protein interaction yool

Alejandro Real-Chicharro, *et al.*

Editor-in-Chief
Melissa Norton, MD

Biology Editor
Penny Webb, PhD

In-house Editor
Tim Sands

BMC Bioinformatics (www.biomedcentral.com/bmc/bioinformatics) is an open access journal published by BioMed Central Ltd. The journal publishes original peer-reviewed research articles in all aspects of computational methods used in the analysis and annotation of sequences and structures, as well as all other areas of computational biology. *BMC Bioinformatics* (ISSN 1471-2105) is indexed/tracked/covered by PubMed, MEDLINE, BIOSIS, CAS, Scopus, EMBASE, Thomson Reuters (ISI) and Google Scholar.
