

**Open Access**

**Proceedings of the European Conference on Computational Biology (ECCB) 2008 Workshop: Annotations, interpretation and management of mutations (AIMM)**

Cagliari, Italy

22 September 2008

Edited by Christopher JO Baker and Dietrich Rebholz-Schuhmann

[www.biomedcentral.com/1471-2105/10?issue=S8](http://www.biomedcentral.com/1471-2105/10?issue=S8)

**S1 Extraction of human kinase mutations from literature, databases and genotyping studies**

Martin Krallinger, Jose MG Izarzugaza, Carlos Rodriguez-Penagos and Alfonso Valencia

**S2 EnzyMiner: automatic identification of protein level mutations and their impact on target enzymes from PubMed abstracts**

Suveyda Yeniterzi and Ugur Sezerman

**S3 Improved mutation tagging with gene identifiers applied to membrane protein stability prediction**

Rainer Winnenburger, Conrad Plake and Michael Schroeder

**S4 Annotation of protein residues based on a literature analysis: cross-validation against UniProtKb**

Kevin Nagel, Antonio Jimeno-Yepes and Dietrich Rebholz-Schuhmann

**S5 An integrated approach to the interpretation of Single Amino Acid Polymorphisms with the framework of CATH and Gene3D**

Jose MG Izarzugaza, Anja Baresic, Lisa EM McMillan, Corin Yeats, Andrew B Clegg, Christine A Orengo, Andrew CR Martin and Alfonso Valencia

**S6 From SNPs to pathways: integration of functional effect of sequence variations on models of cell signalling pathways**

Anna Bauer-Mehren, Laura I Furlong, Michael Rautschka and Ferran Sanz

**S7 MtSNPscore: a combined evidence approach for assessing cumulative impact of mitochondrial variations in disease**

Anshu Bhardwaj, Mitali Mukerji, Shipra Sharma, Jinny Paul, Chaitanya S Gokhale, Achal K Srivastava and Shrish Tiwari

**S8 Correlating protein function and stability through the analysis of single amino acid substitutions**

Yana Bromberg and Burkhard Rost

**S9 Using structural bioinformatics to investigate the impact of non synonymous SNPs and disease mutations: scope and limitations**

Joke Reumers, Joost Schmkowitz and Frédéric Rousseau

**S10 Pairwise and higher-order correlations among drug-resistance mutations in HIV-1 subtype protease**

Omar Haq, Ronald M Levy, Alexandre V Morozov and Michael Andrec

**Editor-in-Chief**  
Melissa Norton, MD

**Biology Editor**  
Penny Webb, PhD

**In-house Editor**  
Tim Sands

*BMC Bioinformatics* ([www.biomedcentral.com/bmc/bioinformatics](http://www.biomedcentral.com/bmc/bioinformatics)) is an open access journal published by BioMed Central Ltd. The journal publishes original peer-reviewed research articles in all aspects of computational methods used in the analysis and annotation of sequences and structures, as well as all other areas of computational biology. *BMC Bioinformatics* (ISSN 1471-2105) is indexed/tracked/covered by PubMed, MEDLINE, BIOSIS, CAS, Scopus, EMBASE, Thomson Reuters (ISI) and Google Scholar.
