

IMSCCS Symposium of Computational Biology and Bioinformatics (SCBB06)

June 21-22, 2006, Zhejiang University, Hangzhou, China

Description:

This BMC Bioinformatics supplement issue consists of 27 peer-reviewed papers selected from IMSCCS Symposium of Computational Biology and Bioinformatics (SCBB) held in Zhejiang University, Hangzhou, China on June 21-22, 2006. This symposium is designed to bring together computational biology and bioinformatics researchers to develop fundamental methods, algorithms, and research software for analyzing biological data and files.

We received submissions both from the presenters at the symposium as well as non-presenters. Submitted manuscripts were rigorously reviewed by at least two referees. The quality of each paper was evaluated on the contributions to computational biology, and bioinformatics. We required technical novelty and expression rigor in methodology.

We would like to thank the symposium presenters and participants who made this special issue possible. Special thanks go to the editors of BMC Bioinformatics who advised us in preparing the manuscripts. Finally we acknowledge IMSCCS organizers and program committee for their support and coordinating.

Editors:

Jun Ni, Ph.D. Department of Computer Science, University of Iowa, USA (Co-Chair of SCBB06)

Youping Deng, Ph.D., Department of Biology, University of Southern Mississippi, USA (Chair of SCBB06)

Program Committee:

Ann Loraine, University of Alabama,
USA

Bo Yan, University of Georgia, USA

Cheng Cheng, St Jude Children's
Research Hospital, USA

Chun-Hsi Huang, University of
Connecticut, USA

Edward J Perkins, US Army Engineer
Research and Development Center,
USA

Feng Luo, Clemson University, USA

H.A. Nagarajaram, Centre for DNA
Fingerprinting and Diagnostics, India

Hesham Ali, University of Nebraska,
USA

Hui-Huang Hsu, TamKang University,
Taiwan

Jun Ni, Ph.D. Department of Computer
Science, University of Iowa, USA

Konagaya Akihiko, Riken Genomic
Sciences Center, Japan

Robin McEntire, GlaxoSmithkline,
USA

See-Kiong Ng, Institute for Infocomm
Research, Singapore

Shiyong Lu, Wayne State University,
USA

Sunil Marthur, University of
Mississippi, USA

Xue-wen Chen, University of Kansas,
USA

Xuhua Xia, University of Ottawa,
Canada

Youping Deng, University of Southern
Mississippi, USA

Zhirong Sun, Tsinghua University,
China
