

Open Access

The 2008 International Conference on Bioinformatics & Computational Biology (BIOCOMP'08)

Las Vegas, NV, USA
14-17 July 2008

Youping Deng, Mary Qu Yand, Hamid R Arabnia and Jack Yang

www.biomedcentral.com/1471-2164/10?issue=S1

I1 High-throughput next generation sequencing technologies foster new computing techniques in bioinformatics

Mary Qu Yang et al.

S1 Prediction of DNA-binding residues from protein sequence information using random forests

Liangjiang Wang et al.

S2 Reconstruct gene regulatory network using slice pattern model

Yadong Wang et al.

S3 Comparison of feature selection and classification for MALDI-MS data

Qingzhong Liu et al.

S4 Genome-wide prediction of cis-acting RNA elements regulating tissue-specific pre-mRNA alternative splicing

Xin Wang et al.

S5 Comprehensive splicing graph analysis of alternative splicing patterns in chicken, compared to human and mouse

Elsa Chacko and Shoba Ranganathan

S6 Annotating the human genome with disease ontology

John D Osborne et al.

S7 Unfoldomics of human diseases: linking protein intrinsic disorder with diseases

Vladimir N Uversky et al.

S8 An ensemble learning approach to reverse-engineering transcriptional regulatory networks from time-series gene expression data

Jianhua Ruan et al.

S9 Energy profile and secondary structure impact shRNA efficacy

Hong Zhou and Xiao Zeng

S10 RBT-GA: A novel metaheuristic for solving the multiple sequence alignment problem

Javid Taher and Albert Y Zomaya

S11 Genomic and systems evolution in *Vibrionaceae* species

Jianying Gu et al.

S12 Protein disorder in the human diseaseome: unfoldomics of human genetic diseases

Uros Midic et al.

S13 PDA: an automatic and comprehensive analysis program for protein-DNA complex structures

RyangGuk Kim and Jun-tao Guo

S14 Differences in duplication age distributions between human GPCRs and their downstream genes from a network prospective

Yong Huang et al.

S15 Reverse engineering module networks by pso-rnn hybrid modeling

Yuji Zhang et al.

S16 HAPPI: an online database of comprehensive human annotated and predicted protein interactions

Jake Yue Chen et al.

S17 Comparing 2-nt 3' overhangs against blunt-ended siRNAs: A systems biology based study

Preetam Ghosh et al.

S18 Word-based characterization of promoters involved in human DNA repair pathways

Jens Lichtenberg et al.

S19 A distribution-free convolution model for background correction of oligonucleotide microarray data

Zhongxue Chen et al.

Editor-in-Chief
Melissa Norton, MD

Biology Editor
Penny Webb, PhD

In-house Editor
Matthew Kaiser

BMC Genomics (www.biomedcentral.com/bmcgenomics) is an open access journal published by BioMed Central Ltd. The journal publishes original peer-reviewed research articles in all aspects of genome-scale analysis, functional genomics, and proteomics. *BMC Genomics* (ISSN 1471-2164) is indexed/tracked/covered by PubMed, MEDLINE, BIOSIS, CAS, Scopus, EMBASE, Zoological Record, Thomson Reuters (ISI) and Google Scholar.
