

Additional file 1: Grouping of expression profiles using a 5x5 self-organizing map (SOM). Interesting profiles were found in cluster 1, 2, 6, 24 and 25. The first 3 clusters show an up-regulation from T2 while cluster 24 and 25 are upregulated at T1 and subsequently downregulated. Dark blue colors corresponds to the mean expression profile for each cluster, dark blue bars corresponds to cluster standard deviation, light blue color bars represents cluster max-min values, the green number represents cluster size and the red number represents cluster ID.
