

Table 3 Aspects of ART-related problems

i	Technical aspect	Continuing technological development of ART may result in as yet inadequately researched side-effects and unforeseen social problems.
ii	Social aspect	Social prejudice against infertility and ART highlights need for support system. Volatility of public opinion.
iii	Legal aspect	Need for prompt and comprehensive legislation that can be adapted to meet technical advances.
iv	Economic aspect	Inequality and inadequacy of financial support puts additional financial burden on less well-off families.
v	Family aspect	Possibility of conflict between the rights of children and the rights of parents.
vi	Ethical aspect	Problem of where to draw the line in terms of the intervention of science into the act of human reproduction.
