

Reviewer's report

Title: Methacholine Bronchial Provocation Measured by Spirometry versus Wheeze Detection in Preschool Children

Version: 3 **Date:** 7 April 2005

Reviewer: Lou Prof Landau

Reviewer's report:

General

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Figures 3 to 5 need to be in a more readable format.

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes
