Reviewer’s report

Title: Brain regions essential for improved lexical access in an aged aphasic patient: A case report

Version: 4 Date: 22 June 2006

Reviewer: Bruce Crosson

Reviewer’s report:

General
Most of my concerns have been adequately addressed.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
None

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
None

Discretionary Revisions (which the author can choose to ignore)
None

What next?: Accept without revision

Level of interest: An exceptional article

Quality of written English: Acceptable

Statistical review: No

Declaration of competing interests:
