

Reviewer's report

Title: Buprenorphine versus dihydrocodeine for opiate detoxification in primary care: A randomised controlled trial [ISRCTN07752728]

Version: 2 Date: 7 December 2006

Reviewer: magi farre

Reviewer's report:

General

In this re-submission, the authors answered almost all questions of the reviewers. They included a large introduction about the limitations of the study in the discussion sections.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

None

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

None

Discretionary Revisions (which the author can choose to ignore)
What analytical method was used to determine opiates in urine?

What next?: Accept after minor essential revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No
