

## Reviewer's report

**Title:** Dietary antioxidants protect epithelial cells from oxidant-induced apoptosis

**Authors:**

Mark JS Miller ([millermj@mail.amc.edu](mailto:millermj@mail.amc.edu))  
Fausto M Angeles ([fmangelesf@usa.com](mailto:fmangelesf@usa.com))  
Brian K Reuter ([ok\\_go@hotmail.com](mailto:ok_go@hotmail.com))  
Paul Bobrowski ([bobrowski@amazonmedicines.com](mailto:bobrowski@amazonmedicines.com))  
Manuel Sandoval ([sandovm@mail.amc.edu](mailto:sandovm@mail.amc.edu))

**Version:** 3 **Date:** 4 Dec 2001

**Reviewer:** Dr C Payne

**Level of interest:** A paper whose findings are important to those with closely related research interests

**Advice on publication:** Accept without revision

I just completed the review of the revised manuscript, and now find it ACCEPTABLE for publication.

**Competing interests:**

None declared.
