Reviewer's report

**Title:** A technique to train new oculomotor behavior in patients with central field loss during reading related tasks using scanning laser ophthalmoscopy: immediate functional benefits and gain retention

**Version:** 3  **Date:** 9 November 2006

**Reviewer:** Gregory Goodrich

**Reviewer's report:**

General

------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

The manuscript would benefit from a review. For example, the first sentence under the "Discussion" heading appears to have words missing. Also, the word "constraint" is mispelled in reference #24.

------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

------------------------------------------------------------------------------------------------------------------

**What next?:** Accept after discretionary revisions

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** No

**Declaration of competing interests:**
