Reviewer's report

Title: Brain regions essential for improved lexical access in an aged aphasic patient: A case report

Version: 4 Date: 26 June 2006

Reviewer: Stefan Knecht

Reviewer's report:

General
The manuscript was changed according to my previous comments. The authors addressed adequately my original concerns, and did their best with the existing data.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No

Declaration of competing interests:
