Cover letter to referee 1 concerning the manuscript 9719233753325498 - Physiotherapists’ experiences of physiotherapy interventions in scientific physiotherapy publications focusing on the interventions for children with cerebral palsy: a qualitative phenomenographic approach

Thank you for the opportunity to resubmit once again and for your fruitful help during the submission processes.

The grammatical errors are corrected

1st paragraph in methods- experience
2nd paragraph in methods- discriminate
Sentence above description of analysis: questions were asked of the material? Now reads "Questions (see below) were formulated for every step of the analysis and directed to the material in order to sharpen the analysis."
Section C: making it normal- none are related

Kind regards the authors / Ingalill Larsson
