Reviewer's report

Title: Integrated Problem-Based Learning in the Neuroscience Curriculum- The SUNY Downstate Experience

Version: 5 Date: 22 August 2006

Reviewer: Mark Albanese

Reviewer's report:

General

-------------------------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-------------------------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

1. I assume the statistician recommended dichotomization due to small expected cell frequencies for some items. A footnote to this effect in the table would be helpful.

2. on p. 16, para 1 second sentence, I think a word or two is missing.

-------------------------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No
