Dear editor,

Thankyou for accepting for publication our original research report proposed for publication in BMC Pregnancy and Childbirth:

Effects Of Carrying A Pregnancy and of Method of Delivery on Urinary Incontinence: A Prospective Cohort Study

Attached is our revision. The manuscript has been revised according to reviewer suggestions and BMC guidelines. Specifically: the formatting of the paper and references has been changed to conform with the instructions. One reviewer suggested that the discussion be streamlined and shortened, which has been done. Other minor suggestions by reviewers were adopted.

University of Ottawa is a BMC member.

The word processor is Word 97-SR2 and the references are prepared with Reference Manger Ver 9.

Respectfully submitted,

Erica Eason, SM, MDCM, FRCS(C)  
Associate professor, Obstetrics/Gynaecology and Clinical Epidemiology  
U. of Ottawa
