Reviewer's report

Title: Validity Evidence for a Simulated Patient Feedback Instrument

Version: 1 Date: 22 September 2011

Reviewer: Andreas Holzinger

Reviewer's report:

This is a very good, interesting and relevant paper and is well written, I strongly recommend acceptance, the only issue which the authors could improve is to enlarge the background and related work section, there is much more related work on this issue, and the authors could improve their paper by running a current literature analysis to backup their paper with more related work, here only two suggestions:

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests
