

Reviewer's report

Title: Psychiatric services in primary care settings: a survey of general practitioners in Thailand

Version: 6 **Date:** 19 June 2006

Reviewer: David Armstrong

Reviewer's report:

General

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

I think the authors have responded well to my comments and while they perhaps have still not grasped the difference between an effect size and a p value I think the paper is much improved and now merits publication.

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No

Declaration of competing interests:
