

Reviewer's report

Title: Use of and attitudes to a hospital information system by medical secretaries, nurses and physicians deprived of the paper-based medical record. A case report.

Version: 2 Date: 25 March 2004

Reviewer: Shaun Treweek

Reviewer's report:

The authors have done an excellent job of addressing my comments and I would be happy to see the article published.

There were a couple of small things though. However, I think these could be dealt with by the editorial team. The first is that there are seven figures but the captions (pages 13 and 14 of the new manuscript) still only go to figure 6 because there are two captions called Figure 3. The authors didn't pick this up although they tried to. Easy to miss. If the second caption called Figure 3 is changed to Figure 4, the one called Figure 4 is changed to Figure 5 etc then the problem is solved.
