

## **Reviewer's report**

**Title:** Modelling the public health impact of male circumcision for HIV prevention in high prevalence areas in Africa

**Version:** 2 **Date:** 30 August 2006

**Reviewer:** Emmanuel Lagarde

### **Reviewer's report:**

The authors have satisfactorily answered all points raised by reviewers and I now see no reason why this paper should not be published. I however still think that an estimate of the cost per HIV infection averted would be both helpful and feasible.

**What next?:** Accept after discretionary revisions

**Level of interest:** An article of outstanding merit and interest in its field

**Quality of written English:** Acceptable

**Statistical review:** No

### **Declaration of competing interests:**
