

Reviewer's report

Title: Self-rated Health among Mayan Women participating in a Randomised Intervention Trial reducing Indoor Air Pollution in Guatemala

Version: 5 Date: 16 May 2008

Reviewer: Sean Semple

Reviewer's report:

In the revised manuscript the authors have dealt comprehensively with the comments I previously had on this paper. It is an excellent study of the health benefits of a simple intervention to improve indoor air quality in this community and the revised manuscript adds significantly to the literature in this field.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
