Reviewer's report

Title: Neuroregeneration in neurodegenerative disorders

Version: 1 Date: 12 May 2011

Reviewer: Tanya Gurevich

Reviewer's report:

A-M Enciu et al in their review article are discussing the issues of neuroregeneration in neurodegenerative disorders. Although it is the review paper, the issue is important and actual and is worse of publication. the paper is well written and of appropriate length.

Minor revisions:

1. In the "background" part: the concept of neuroregeneration (which is now is explained in the "legend")- has to be explained in the text of background, with the reference to the figure 1: "A schematic representation of the neuroregeneration concept and the dual relationships between its components are presented in the figure 1". The figure 1 has to be labeled.

2. The term "neurorestoration" is written as "neurorestauration" in a few places.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
