David Sokal ([dsokal@fhi.org](mailto:dsokal@fhi.org))

**Version:** 3 **Date:** 26 July 2006

### **Author's response to reviews:**

We modified a sentence page 10 3rd paragraph.

"The risk of early recanalization was similar either the men suffered or not a vasectomy related adverse event"

now reads:

"The risk of early recanalization was similar whether or not the men experienced a vasectomy related adverse event."
