Dear Dr. Phillips,

Re. A semi-qualitative study of attitudes to vaccinating adolescents without parental consent
MS: 1797314783117718

Thank you for the provisional acceptance of this paper. In line with your request, the following corrections have been made:

1. In Methods, p6, we have added a sentence to the effect that completion and return of the questionnaire signified consent to the study.
2. A conclusion has been added. The abstract conclusion has been slightly modified to reflect this.
3. A statement of competing interests has been added after the conclusion.
4. Lines (row and columns) have been made apparent on Table 1.

I hope this covers everything.

Yours sincerely,

Loretta Brabin PhD
