

Reviewer's report

Title: Potential Cost Savings with Terrestrial Rabies Control

Version: 7 **Date:** 16 February 2007

Reviewer: Jakob Zinsstag

Reviewer's report:

General

I looked through all points revised by the authors. The manuscript is has improved now although there is still an overwhelming mass of detail. What I somehow still miss is a comprehensive framework for the ultimate economic assessment. This should not prevent this manuscript to be published now, but may be a recommendation for the future orientation of this important research work. I remain at your disposition for further comments.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)
