

Reviewer's report

Title: Searching for observational studies: what does citation tracking add to Pub Med? A case study in depression and coronary heart disease

Version: 2 Date: 27 May 2005

Reviewer: Margaret Sampson

Reviewer's report:

General

This paper has been strengthened considerably and I am satisfied with all revisions.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-none noted

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-none noted

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No

Declaration of competing interests:

I declare that I have no competing interests.
