Open Access

4th International Conference of cGMP Generators, Effectors and Therapeutic Implications

Regensburg, Germany
19-21 June 2009

www.biomedcentral.com/1471-2210/9?issue=S1

Oral presentations
S1-S45

Poster presentations
P1-P80

See following pages for a complete list of the abstracts
Oral presentations

S1. Steve H Abman
   Impaired NO-cGMP signaling in the pathogenesis of neonatal pulmonary hypertension and therapeutic implications

S2. Louisa McRobert, Helen M Taylor, Cathy J Taylor, Wensheng Deng, Robert W Moon, Quinton L Fivelman, Munira Grainger, Spencer D Polley, Audrey Sicard, Oliver Billker, Anthony A Holder, David A Baker
   The role of the cGMP-dependent protein kinase in development of the malaria parasite

S3. Joseph A Beavo, James Surapisitchat, Candance Parchen
   Cyclic nucleotide phosphodiesterases – 40 years of progress

S4. Padma Baskaran, Samba Couloubaly, Jamila Hedhli, Chirag Patel, Smita Shukla, Annie Beuve
   Thiol-dependent redox modulation of soluble guanylyl cyclase

S5. Martin Biel, Stylianos Michalakis, Xiangang Zong, Elvir Becirovic, Alexander Pfeifer
   Physiological roles of cGMP-gated channels: lessons from mouse models and human channelopathies

S6. Peter Brouckaert, Anje Cauwels, Robrecht Thoonen, Emmanuel Buys, K D Bloch, Patrick Sips, Fumito Ichinoise, Elke Rogge, Sofie Nimegeers, Johan Van de Voorde, Romain Lefebvre, Johannes-Peter Stasch
   Phenotypes of sGC mutant mice in basic conditions, disease and shock

S7. Frank V Brozovich
   cGMP effects on vascular tone: modulating the activity of myosin light chain phosphatase

S8. John C Burnett, Jr
   Modulating cGMP in heart failure by novel natriuretic peptides

S9. James M Downey, Yanping Liu, Wenkwan Xin
   The role of cGMP and PKG in cardioprotection

S10. Philip Eaton
    Redox regulation of protein kinase G

S11. Huige Li, Ning Xia, Andreas Daiber, Alice Habermeier, Qing Lu, Matthias Oelze, Ellen I Closs, Thomas Münzel, Ulrich Förstermann
    Molecular mechanisms underlying pharmacological stimulation of eNOS expression and eNOS activity

S12. Dieter Groneberg, Peter König, Doris Koesling, Andreas Friebe
    NO signalling in mice lacking the NO receptor guanylyl cyclase

S13. Mihai Gheorghiade
    Acute heart failure syndromes

    On behalf of the study group.
    Riociguat dose titration in patients with chronic thromboembolic pulmonary hypertension (CTEPH) or pulmonary arterial hypertension (PAH)
S15. Franz Hofmann, Robert Lukowski, Beate Spießberger, Jens Schlossmann, Pascal Weinmeister
Rescue of cGMP kinase I and the cause of premature death

S16. John Horowitz, Yuliy Chirkov, Rebecca Ritchie
Nitric oxide resistance at the platelet level: pathophysiology and therapeutic implications

S17. Ryuji Inoue, Zhong Jian, Hai Lin, Shinichi Takahashi, Naomi Geshi, Akira Honda, Masayuki Mori
GMP-mediated regulation of cardiovascular Ca\(^{2+}\) entry channel TRPC6 and its pathophysiological implications

S18. David A Kass, Norimichi Nagayama, Manling Zhang, Dong-ik Lee, Steven Hsu, Elizabeth Ketner, Eiki Takimoto
Novel mechanisms of anti-hypertrophic effects from PDE5A inhibition

S19. U Benjamin Kaupp
Forget cooperativity! - Single-molecule signalling with cGMP

S20. Hiroshi Kawaguchi, Hirotaka Chikuda, Yosuke Kawasaki, Franz Hofmann
Cyclic GMP-dependent protein kinase II promotes chondrocyte hypertrophy and skeletal growth

Role of cGMP-dependent protein kinases for fear memory formation in the lateral amygdala

S22. Jun Yin, Stephanie M Kaestle, Michael Mertens, Wolfgang M Kuebler
Yin and Yang of cGMP signalling in hydrostatic lung edema

S23. Michaela Kuhn, Kristine Schwarz, Michael Hartmann, Javier Carbajo-Lozoya, Ulrich Flögel, Jörg Stypmann, Martin van Eickels, Stepan Gambaryan, Thomas Wieland, Hideo A Baba
The natriuretic peptide / guanylyl cyclase-A system functions as a stress-responsive regulator of angiogenesis in mice

Phosphodiesterase-5 inhibition and cardioprotection: potential role of hydrogen sulfide

S25. Ceng Luo, Rohini Kuner
Presynaptic cGMP-dependent protein kinase-I mediates synaptic potentiation in spinal amplification of pain

S26. Robert Lukowski, Franz Hofmann
cGKI signaling in cardiac hypertrophy

A molecular view of the regulation of sGC activity

S28. Masafumi Myoishi, Amy Simon, Michael E Mendelsohn
Cyclic GMP-dependent protein kinase regulation of airway smooth muscle in asthma

S29. Zongmin Zhou, Nazish Sayed, Anastasia Pyriochou, David Fulton, Annie Beuve, Andreas Papapetropoulos
Regulation of soluble guanylyl cyclase by phosphorylation
S30. John D Parker, Tommaso Gori
Nitrate-induced tolerance, toxicity and preconditioning: a rationale for reconsidering the use of these drugs

S31. R Scott Stephens, O Rentsendorj, Eric P Schmidt, Paul Hassoun, Aigul Moldobaeva, David B Pearse
Janus-faced signaling of cGMP in acute lung injury

S32. Hema Rangaswami, Nisha Marate Shunhui Zhuang, Yongchang Chen, Renate B Pilz
Role of PKG II in osteoblast mechanotransduction

S33. Matthias Sausbier, Usamah Abdullah, Ulrike Sausbier, Yi-Liu Liao, Hong Zhao, Marcus Makowski, Susanne Feil, Robert Feil, Franz Hofmann, Alfred Nordheim, René Botnar, Peter Ruth
The PKG1 specific phosphorylation substrate cysteine-rich protein 2 decreases blood pressure and intimal hyperplasia

S34. Peter Sandner
cGMP elevation: new treatment options for lower urinary tract disorders

S35. Jeson Sangaralingham, Fernando L Martin, Paul M McKenzie, Tomoko Ichiki, Selma F Mohammed, Gerald E Harders, Elise A Oehler, Horg H Chen, Margaret M Redfield, John C Burnett Jr
Progressive decline in circulating CNP with aging is associated with progressive cardiac fibrosis and myocardial impairment

S36. Jens Schlossmann, Matthias Desch, Bernhard Hieke, Katharina Salb, Elisabeth Schinner
Functional dissection of the cGK substrate IRAG using transgenic models

S37. Christina Achim Schmidtko, Wei Gao, Peter König, Sandra Heine, Matthias Sausbier, Peter Ruth, Doris Koesling, Irmgard Tegeder, Andreas Friebe, Gerd Geisslinger
cGMP-dependent signaling pathways in spinal pain processing

S38. Annika Rauch, Michael Russwurm, Christine Schlicker, Martina Leipelt, Clemens Steegborn
Structural and mechanistic insights into cGMP signaling

S39. Yutang Wang, Hanzhong Liu, Gavin McKenzie, Paul K Witting, Johannes-Peter Stasch, Michael Hahn, Katherine A Jackman, Dechaboon Changsirivathanathamrong, Ben J Wu, Helen J Ball, Shane R Thomas, David S Celermajer, Andrew L Mellor, Chris G Sobey, John F Keaney Jr, Nicholas H Hunt, Roland Stocker
Kynurenine is a novel endothelium-derived vascular relaxing factor produced during inflammation

S40. Daisuke Taura, Masakatsu Sone, Koichiro Homma, Kenichi Yamahara, Kazuwa Nakao
Cyclic GMP signalling in human ES and iPS-derived vascular cells

S41. Robrecht Thoonen, Emmanuel Buys, Anje Cauwels, Elke Rogge, Sofie Nimmeegeers, Maureen Van den Hemel, Tino Hoepegem, Johan Van de Voorde, Johannes-Peter Stasch, Peter Brouckaert
NO-insensitive sGCbeta1 H105F knockin mice: if NO has no place to go

S42. Focco van den Akker, Xiaolei Ma, Faye Martin, Priyaranjan Pattanaik, Pius Padayatti, Matthew Warman, Annie Beuve
Structural insights into sGC

S43. Ulrich Walter & Stepan Gambaryan
Cross-talk of inhibitory and stimulatory signalling pathways of human platelets
S44. Yafelle Serulle, Ipe Ninan, Daniela Puzzo, Maria McCarthy, Latika Khatri, Ottavio Arancio, Edward Ziff
A role for cGMP-dependent protein kinase II in AMPA receptor trafficking and synaptic plasticity

S45. Frank Zufall
Receptor guanylyl cyclases in mammalian olfaction: from genes to function

Poster presentations

P1. Najla Arshad, Sandhya S Visweswariah
Glycosylation of human receptor guanylyl cyclase C

P2. Reshma S Baliga, Sarah Trinder, Chris J Scotton, Rachel C Chambers, Raymond J MacAllister, Adrian J Hobbs
Manipulating the natriuretic peptide system for the treatment of pulmonary hypertension

P3. Matteo Beretta, Antonius C F Gorren, M Verena Wenzl, Robert Weis, Michael Russwurm, Doris Koesling, Kurt Schmidt, Bernd Mayer
Bioactivation of nitroglycerin by the East Asian variant of aldehyde dehydrogenase-2

P4. Guido Boerrigter, Lisa C Costello-Boerrigter, Syed Ameenuddin, Douglas W Mahoney, Joshua P Slusser, Denise M Heublein, Margaret M Redfield, Richard J Rodeheffer, Timothy M Olson, John C Burnett Jr
B-type natriuretic peptide single nucleotide polymorphism rs198389 and survival in the general community

P5. Emmanuel S Buys, Anje Cauwels, Michael J Raher, Jonathan J Passeri, Ion Hobai, Sharon M Cawley, Kristen M Rauwerdink, Patrick Y Sips, Robrecht Thoonen, Marielle Scherrer-Crosbie, Fumito Ichinose, Peter Brouckaert, Kenneth D Bloch
sGCα1β1 attenuates cardiac dysfunction and mortality in murine inflammatory shock models

The first crystal structure of cyclic GMP-dependent protein kinase Iβ dimerization/docking domain reveals molecular details of isoform-specific anchoring

P7. Horng H Chen, Alessandro Cataliotti, Fernando L Martin, John A Schirger, John C Burnett Jr
Renal targeted protein therapeutics in experimental overt heart failure with renal dysfunction

P8. Horng H Chen, Brenda K Huntley, Alessandro Cataliotti, Fernando L Martin, John C Burnett Jr
Mutation of three amino acids in the disulfide-ring of a CNP based chimeric natriuretic peptide alters its vascular properties

P9. Lisa C Costello-Boerrigter, Guido Boerrigter, Syed Ameenuddin, Douglas W Mahoney, Joshua P Susser, Denise M Heublein, Margaret M Redfield, Richard J Rodeheffer, Timothy M Olson, John C Burnett Jr
B-type natriuretic peptide single nucleotide polymorphism rs198389 is highly prevalent and impacts test characteristics of common assays
P10. Kelly Decaluwé, Sofie Nimmegeers, Robrecht Thoonen, Peter Brouckaert, Johan Van de Voorde
In vitro and in vivo studies on the importance of the soluble guanylyl cyclase alpha 1 subunit in penile erection

P11. Matthias Desch, Katja Sigl, Jörg Wegener, Robert Feil, Susi Feil, Franz Hofmann, Jens Schlossmann
Cardiovascular and gastrointestinal function of IRAG

P12. Deborah M Dickey, Andrea R Yoder, Lincoln R Potter
ANP mutation causes reduced proteolysis

P13. Bakytbek Egemnazarov, Akylbek Sydykov, Ralph T Schermuly, Norbert Weissmann, Johannes-Peter Stasch, Werner Seeger, Friedrich Grimminger, Hossain A Ghofrani
sGC activators and stimulators attenuate ischemia/reperfusion injury of the lung

Internalization and degradation of natriuretic peptide receptor-A is stimulated by ligand binding

Warfarin pharmacodynamics and pharmacokinetics are not affected by the soluble guanylate cyclase stimulator riociguat (BAY 63-2521)

P16. Martin Göttle, Frieder Kees, Roland Seifert
Cytidyl cyclase activity of bacterial exotoxins

P17. Martina Griesberger, Gerald Wölkart, Antonius Gorren, Matteo Beretta, Verena Wenzl, Juliane Brettschneider, Andreas Seeling, Jochen Lehmann, Michael Russwum, Doris Koesling, Kurt Schmidt, Bernd Mayer
Bioactivation of pentaerythrityl tetranitrate by mitochondrial aldehyde dehydrogenase

P18. Dieter Groneberg, Doris Koesling, Andreas Friebe
Evaluation of ODQ as specific inhibitor of NO-sensitive guanylyl cyclase using mice deficient for the enzyme

Blood pressure-independent effects of enhanced NO/cGMP signalling and gender on aortic remodelling in experimental renal hypertension

P20. Nadine Haase, Monika Seeanner, Tobias Haase, Soenke Behrends
Lack of correlation between sGC subunit expression and sGC activity in cerebral development is due to non-heterodimerizing subunits in vivo

P21. Tobias Haase, Nadine Haase, Soenke Behrends
Direct evidence for close proximity of catalytic and regulatory domains of heterodimeric sGC based on fluorescence resonance energy transfer

P22. Michael Hartmann, Katharina Völker, Birgit Gaßner, Juliane Schröter, Beatrice Dankworth, Thomas Müller, Viacheslav O Nikolaev, Michaela Kuhn
A splice variant of the guanylyl cyclase-A receptor interferes with atrial natriuretic peptide (ANP) signaling

P23. Eva Heining, Raphaela Schwappacher, D Horbelt, Otmar Huber, Petra Knaus
Crosstalk of cyclic GMP dependent kinase I and BMP signaling
P24. Arnau Hervera, Roger Negrete, Sergi Leánez, Olga Pol
Lack of mechanical and thermal allodynia, and thermal hyperalgesia induced by peripheral neuropathic pain in NOS2 knockout mice

P25. Bernhard Hieke, Jens Schlossmann
Subcellular distribution of cGMP signalling proteins in VSMCs of IRAG KO mice

P26. Linda Sarah Hoffmann, Peter Michael Schmidt, Yvonne Keim, Stefan Schaefer, Harald Schmidt, Johannes-Peter Stasch
Distinct molecular requirements for activation or stabilization of soluble guanylyl cyclase upon haem oxidation-induced degradation

P27. Tomoko Ichiki, Brenda K Huntley, S Jeson Sangaralingham, Horng H Chen, John C Burnett Jr
A novel designer natriuretic peptide CD-NP suppresses TGF-beta 1 induced collagen Type I production in human cardiac fibroblasts

P28. Ronald Jäger, Corina Russwurm, Doris Koesling, Michael Russwurm
GAF domain-induced activation of phosphodiesterases 2 and 5

P29. Emma S Jones, Barbara K Kemp-Harper, Johannes-Peter Stasch, Harald HHW Schmidt, Robert E Widdop
Cardioprotective effects in aged spontaneously hypertensive rats due to chronic stimulation/activation of sGC without hypotension

P30. Philipp Kalk, Yuliya Sharkovska, Bettina Lawrenz, Michael Godes, Linda Sarah Hoffmann, Kathrin Wellickisch, Sandra Geschka, Katharina Relle, Berthold Hocher, Johannes-Peter Stasch
Cardio-renal protection of riociguat (BAY 63-2521) in low- and high-renin models of hypertension

P31. Barbara Kemp-Harper, Ravina Ravi, Michelle Bullen, Rebecca Ritchie, Christopher Sobey, Alyson Miller
Nitroxyl, the novel redox sibling of NO, suppresses cerebrovascular NADPH oxidase

P32. Hideyuki Kinoshita, Koichiro Kuwahara, Ryuji Inoue, Motohiro Nishida, Hitoshi Kurose, Shigeki Kiyonaka, Yasuo Mori, Masaki Harada, Masao Murakami, Yasuaki Nakagawa, Shinji Yasuno, Satoru Usami, Masataka Fujiwara, Yoshihiro Kuwabara, Takeya Minami, Yuko Yamada, Kenji Ueshima, Kazuwa Nakao
Cardiac natriuretic peptides inhibit TRPC6-mediated prohypertrophic signaling through cGMP-PKG pathway

P33. Ichiro Kishimoto, Takeshi Tokudome, Hideki Chusho, Kazuwa Nakao, Kenji Kangawa
C-type natriuretic peptide is a Schwann cell-derived factor for development and function of sensory neurons

P34. Michael Klaiber, Katharina Völker, Birgit Gaßner, Andrea Gerling, Susanne Feil, Robert Feil, Michaela Kuhn
The ANP/cGMP/cGMP-dependent protein kinase pathway counteracts Angiotensin II-stimulated calcium mobilization in cardiac myocytes

P35. Sevil Korkmaz, Tamás Radovits, Enikő Barnucz, Kristóf Hirschberg, Philipp Neugebauer, Sivakkanan Loganathan, Stefan Zöllner, Szabolcs Páli, Beatrice Seidel, Matthias Karck, Gábor Szabó
Pharmacological activation of soluble guanylate cyclase activator protects the heart against isoproterenol-induced myocardial ischemia in rats
P36. Thomas Krieg, Yanping Liu, Thomas Rütz, Carmen Methner, Xi-Ming Yang, Stephan B Felix, James M Downey
BAY 58-2667, an NO-independent guanylyl cyclase activator, pharmacologically post-conditions rabbit and rat hearts

P37. Martina Krüger, Sebastian Kötter, Anika Grützner, Patrick Lang, Christian Andresen, Margaret M Redfield, Elke Butt, Cris G dos Remedios, Wolfgang A Linke
Protein kinase G modulates human myocardial passive stiffness by phosphorylation of the titin springs

P38. Christina Kruuse, Saurabh Gupta, Elisabet Nilsson, Lars Kruse, Lars Edvinsson
Differential effects of selective PDE5 inhibitors in rat cerebral arteries in vitro and in vivo

P39. Emmanuelle Laffly, Jane Macdonald, Elsa Garcin
From biochemical and structural studies of soluble guanylate cyclase toward drug design

P40. Veronika Leiss, Andreas Friebe, Franz Hofmann, Robert Lukowski
cGMP kinase I regulates glucagon release

P41. Sivakkanan Loganathan, Tamás Radovits, Kristóf Hirschberg, Sevil Korkmaz, Matthias Karck, Gábor Szabó
Phosphodiesterase-5 inhibition delays cardiac dilation and improves myocardial function in a rat model of heart failure due to chronic volume overload

P42. Yan Luo, Olivia Baessler, Mirko Glinski, Michael Sefkow, Mathias Dreger, Hubert Koester
Identification of novel target proteins of cGMP/cAMP signaling pathway using cGMP/cAMP capture compound mass spectrometry (CCMS)

P43. Jane Macdonald, Emmanuelle Laffly, Elsa Garcin
Structural studies of soluble guanylate cyclase

P44. Fima Macheret, Denise Heublein, Brian Lahr, Lisa Costello-Boerrigter, Guido Boerrigter, Paul McKie, Sharon Sandberg, Richard Rodeheffer, Alessandro Cataliotti, John C Burnett Jr
Pro-B-Type natriuretic peptide: a novel, specific biomarker for detection of left ventricular dysfunction in the general community

P45. Antonia Marazioti, Padmamalini Baskaran, Annie Beuve, Carlos Romao, Anastasia Pyriochou, Andreas Papapetropoulos
Effects of carbon monoxide-releasing molecules on cGMP levels and soluble guanylate cyclase activity

P46. Jens Martens-Lobenhoffer, Christin Dautz, Stefanie M Bode-Böger
Quantification of cGMP in human plasma by isotope dilution LC-MS/MS

P47. Björn KI Meijers, Constanze Meye, Johannes-Peter Stasch, Peter Gross, Pieter Evenepoel
The uremic retention solute p-cresyl sulfate alters NO signal transduction by alteration of the soluble guanylate cyclase redox state

P48. Evanthia Mergia, Johannes Stegbauer, Sebastian Friedrich, Ivo Quack, Lars Christian Rump, Doris Koesling
Negative feedback regulation within NO/cGMP pathway attenuates vasodilatory response in renovascular hypertension
Nitric oxide-independent vasodilator rescues heme-oxidized soluble guanylate cyclase from proteosomal degradation

P50. Thomas W Miller, Jeff S Isenberg, David D Roberts
Thrombospontin-1 is a universal inhibitor of soluble guanylate cyclase activation

P51. Veselin Mitrovic, B Swidnicki, Ardeschir Ghofrani, Wolfgang Mück, Nina Kirschbaum, Joachim Mittendorf, Johannes-Peter Stasch, Georg Wensing, Reiner Frey, Silvia Lentini
Acute hemodynamic response to single oral doses of BAY 60-4552, a soluble guanylate cyclase stimulator, in patients with biventricular heart failure

P52. Joachim Mittendorf, Stefan Weigand, Cristina Alonso-Alija, Erwin Bischoff, Achim Feurer, Michael Gerisch, Armin Kern, Andreas Knorr, Dieter Lang, Klaus Muenter, Martin Radtke, Hartmut Schirok, Karl-Heinz Schlemmer, Elke Stahl, Alexander Straub, Frank Wunder, Johannes-Peter Stasch
Discovery of riociguat (BAY 63-2521): a potent, oral stimulator of soluble guanylate cyclase for the treatment of pulmonary hypertension

P53. Candace M Parchen, Dao-Fu Dai, Justin M Percival, Monte Willis, Stanley C Froehner, Joseph A Beavo
Sildenafil ameliorates cardiomyopathy in dystrophin-null (mdx) mice

P54. Fernanda B M Priviero, Julio A Rojas-Moscoso, Alexandre S Silva, Edson Antunes, Angelina Zanesco
Effect of L-carnitine supplementation on the sGC/cGMP pathway in vascular relaxing responses from exercised rats

P55. Anastasia Pyriochou, Athanasios Giannis, Andreas Papapetropoulos
Synthesis and characterization of NS-2028 analogues

P56. Tamás Radovits, Sevill Korkmaz, Sivakkanan Loganathan, Johannes-Peter Stasch, Matthias Karck, Gábor Szabó
Pharmacological preconditioning with the guanylate cyclase activator cinaciguat (BAY 58-2667) protects against reperfusion injury after cardiopulmonary bypass

P57. Kerstin Rauch, Johannes-Peter Stasch, Volkhard Kaever, Roland Seifert
Nucleotidyl cyclase activity of recombinant soluble guanylyl cyclase

The novel NO redox sibling, nitroxy (HNO), prevents cardiomyocyte hypertrophy and superoxide generation via cGMP

P59. Rebecca Ritchie, Jennifer Irvine, Jane Love, John Horowitz, Johannes-Peter Stasch, Barbara Kemp-Harper
Antihypertrophic actions of NO-independent soluble guanylyl cyclase (sGC) ligands BAY 41-2272 and BAY 58-2667 in vitro

P60. Natalia Rukoyatkina, Ulrich Walter, Stepan Gambaryan
NO inhibits platelet apoptosis by cGMP-dependent and-independent pathways

P61. Corina Russwurm, Georg Zoidl, Doris Koesling, Michael Russwurm
The neuronal PDE2A3 splice variant is targeted to membranes via dual acylation
P62. Elisabeth Schinner, Jens Schlossmann
NO/cGMP signalling in platelets

P63. John A Schirger¹, Hong H Chen¹, Josh Slusser², David Hodge², Denise Heublein¹, Alessandro Cataliotti¹, Sharon Sandberg¹, John C Burnett Jr¹
The degree of natriuretic peptide system activation in stable and high risk CHF characterized by increased cystatin C is not reflected in cGMP activation

P64. Hannes Schmidt, Agne Stonkute, René Jüttner, Doris Koesling, Andreas Friebe, Robert Feil, Franz Hofmann, Fritz G Rathjen
C-type natriuretic peptide is a bifurcation factor for sensory neurons

P65. Christian Spangler, Roland Seifert, Volkhard Kaever
Quantitation of cyclic dinucleotides by reversed-phase LC-MS/MS

Sensitive assay for the detection of cyclic nucleotides by mass spectrometry

P67. Beate Spiessberger, Pascal Weinmeister, Franz Hofmann, Claudia Werner, Dieter Saur, Ursula Seidler, Wen Zheng, Jens Schlossmann, Robert Lukowski
The role of cGMP-cGKI-signaling for duodenal bicarbonate secretion

P68. Haroldo A F Toque, Rafael P Morganti, Gilberto De Nucci, Edson Antunes
Mechanisms of relaxant activity of BAY 41-2272 in rat tracheal smooth muscle in vitro

P69. Domingo Triguero, Maria Sancho, Marta García-Flores, Ángeles García-Pascual
Blockade of CNG channels abrogates urethral relaxation induced by soluble guanylate cyclase activation

P70. Yutang Wang, Dechaboon Changsiri, Gavin McKenzie, Johannes-Peter Stasch, Michael Hahn, C Woolfe, D Rajbhandari, David S Celermajer; Roland Stocker
Is kynurenine a novel and important vasodilator in human septic shock?

P71. Yingrui Wang-Rosenke, Dmytro Khadzhynov, Tanja Loof, Stephanie Krämer, Bogdan Iliev, Alice Mika, Hans-H Neumayer, Harm Peters
Stimulation of soluble guanylate cyclase accelerates renal recovery following relief of unilateral ureteral obstruction

P72. M Verena Wenzl, Matteo Beretta, Antonius C F Gorren, Pravas K Baral, Karl Gruber, Michael Russwurm, Doris Koesling, Kurt Schmidt, Bernd Mayer
Role of the general base Glu268 in nitroglycerin bioactivation and mechanism-based superoxide formation by aldehyde dehydrogenase-2

P73. Frank Wunder, Daniel Barufé, Annette Woermann, Markus Milde
Pharmacological characterization of receptor guanylyl cyclase reporter cell lines

P74. Akihiro Yasoda, Hidetomo Kitamura, Toshihito Fujii, Eri Kondo, Naoaki Murao, Masako Miura, Naotetsu Kanamoto, Yasato Komatsu, Hiroshi Arai, Kazuwa Nakao
Therapeutic potential of CNP for skeletal dysplasias

P75. Andrea R Yoder, Matthew D Stone, Tim Griffin, Lincoln R Potter
Determination of new phosphorylation sites within natriuretic peptide receptors using mass spectrometric methods
P76. Andrea R Yoder, Kathryn A Barbieri, Jerid W Robinson, Lincoln R Potter
Possible identification of novel natriuretic peptide receptor phosphorylation sites by alanine/glutamate mutagenesis

P77. Angelina Zanesco, Maria A Delbin, Ana P C Davel, Fernando R Bau, Fernanda B M Priviero, Luciana V Rossoni, Edson Antunes
Effect of exercise training on endothelium-dependent relaxing response and cGMP concentration in pulmonary artery from rats submitted to lung ischemia/reperfusion

P78. Angelina Zanesco, Fernanda M B Priviero, Julio A Rojas-Moscoso, Alexandre S Silva, Edson Antunes
L-arginine supplementation improves aortic vascular relaxation via NO-independent sGC/cGMP signaling in exercised rats

P79. Tong Zhang, Raphaela Schwappacher, Shunhui Zhuang, Renate B Pilz
Regulation of smooth muscle-specific gene expression by cGMP-dependent protein kinase

P80. Zongmin Zhou, Nazish Sayed, Anastasia Pyriochou, David Fulton, Annie Beuve, Andreas Papapetropoulos
Regulation of soluble guanylyl cyclase by phosphorylation
