Reviewer's report

Title: Looking for Predictive Factors of Clinical Response to Adsorptive Granulocyte and Monocyte Apheresis in Patients with Ulcerative Colitis

Version: 2 Date: 4 February 2013

Reviewer: yasuo suzuki

Reviewer's report:

This paper is very interesting and valuable for clinical practice of ulcerative colitis treatment.

Cytapheresis is thought to be a good treatment for patients with active ulcerative colitis, but a only few paper have shown good indications for cytapheresis with active ulcerative colitis patients.

So, the results of this paper are very important.

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
