Date: 29 April 2016

Author's response to reviews:

Dear editor,

We are pleased to hear that our manuscript is potentially suitable for publication in BMC psychiatry.

We have now added the following information regarding consent statements, availability of data, competing interests, and author's contribution in the declaration section (page 17).

Declaration section

Ethics: The study was approved by the local Medical Ethical Committee. Parents and CHPs filled out the questionnaires anonymously. Parents received information about the study by mail. No written informed consent was needed.

Consent to publish: not applicable

Competing Interests: The author(s) declare that they have no competing interests.

Authors’ contribution: MC participated in designing the data collection instruments, performed data collection and analyses, drafted the manuscript. EZ performed data collection, participated in designing the instruments, reviewed and revised the manuscript. SR conceptualized and designed the study, designed the data collection instruments, coordinated and supervised data collection, critically reviewed the manuscript. All authors approved the final manuscript as submitted.

Availability of data and materials: the dataset(s) supporting the conclusions of this article is available on request at the following e-mail address m.r.crone@lumc.nl

Sincerely
Mathilde Crone
