Reviewer’s report

Title: Multivariable analysis of total cholesterol levels in male Swiss Armed Forces conscripts 2006-2012 (N=174,872)

Version: 0 Date: 10 Nov 2015

Reviewer: Stylianos Kapiotis

Reviewer's report:

This paper does not add sufficient new Information, which is of interest for the readers of an international Journal. The data are mainly confirming published data and are limited to swiss young men. The new aspect of regional differences is of no interest for an international Auditorium. This paper should be published in a local Journal (as letter).

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review

Quality of written English
