Reviewer’s report

**Title:** Well differentiated Fetal adenocarcinoma : Should neoadjuvant chemotherapy be performed?

**Version:** 3  **Date:** 20 February 2014

**Reviewer number:** 2

**Reviewer’s report:**

If the role of neoadjuvant chemotherapy is the major point of this manuscript, data with convincing evidence should be presented. It is difficult to accept unavailability of IHC and, if it is difficult to perform IHC, use the other methods showing in vivo chemosensitivity of neoadjuvant treatment.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
