Community and provider perceptions of traditional and skilled birth attendants providing maternal health care for pastoralist communities in Kenya: a qualitative study

RESPONSE TO EDITORIAL AND REVIEWER COMMENTS

1. Respond to remaining referees comments

Referee 2 had only one comment – to format the Braun and Clarke citation in the Methods section correctly, this we have done.

The comments provided by Referee 1 do not actually pertain to our manuscript. They pertain to “MS: 1967421015158350 Qualitative exploration of facilitating factors and barriers to use of antenatal care services by pregnant women in urban and rural settings in Pakistan”

2. Include a Conclusions section After the Discussion

This has been done.

3. Include an Abbreviations section, if appropriate, after the Conclusions section

This has been done.

4. Remove response to the reviewers from the additional files

This has been done.
