Dear Editor

We are pleased to submit the following research article for your consideration entitled:

In Vitro Activity of Tigecycline Against Molecularly Characterized Strains of Enterobacteriaceae Isolated From Phase III Clinical Trials and the Tigecycline Evaluation and Surveillance Trial (TEST)

The information presented in this article will benefit clinical microbiologists and other in understanding data derived from surveillance of bacterial pathogens in comparison to data from clinical trial analysis. All authors have provided a contribution and are in agreement of the content for this manuscript and declare no conflict of interest. We look forward to hearing from you following the peer review comments which will be addressed in a timely fashion and with an updated version if needed.

Yours sincerely

Douglas J. Biedenbach
