Reviewer’s report

Title: Stories for Change: Development of a Diabetes Digital Storytelling Intervention for Refugees and Immigrants to Minnesota using Qualitative Methods

Version: 0 Date: 20 Nov 2015

Reviewer: Elva Arias-Merino

Reviewer’s report:

The main objective of this study was to develop a diabetes digital storytelling intervention with and for immigrant and refugee populations.

However, it is not observed a review of each of the intervention stories (storytelling intervention), only comments that were made based on the results of the focus groups. It is convenient that you present the stories intervention summary.

Or the primary study objective and title should change, because no intervention results are displayed, only a very good qualitative situational diagnosis of the main problems facing the immigrant population with diabetes, which are obviously fundamental for the development of an education intervention to health.

Moreover, in Table # 1 is missing information.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
