Reviewer’s report

Title: Mechanisms of gastroprotection of methanol extract of Melastoma malabathricum leaves

Version: 2  Date: 9 February 2015

Reviewer: Andrés Navarrete

Reviewer’s report:

The authors answered the observations positively. Only I would like to suggest that authors review the last paragraphs of the page 22 because it says: "These observations suggest that the gastroprotection showed by MEMM depends on the absence of mucosal SH compound levels." This sentence is not clear for me because in the follow lines it says that in the gastroprotective effect of methanol extract participate the Sh groups.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
